

QUESTIONNAIRE FOR OFFICIALS IN CHINA

Name:

Organization:

Position:

Date:

1. Would you please introduce yourself?
2. Could you describe your current job and (or) research area?
3. How do you think forestry strategy for addressing climate change can contribute to carbon neutrality?
4. Which do you think forestry climate mitigation strategies have more potential to help achieve carbon neutrality, and why?
5. Which do you think forestry climate mitigation strategies have the more challenges to help achieve carbon neutrality, and why?
6. In the context of carbon neutrality, what do you think are the challenges for implementing strategies of increasing forestry carbon sinks (e.g., forest resource cultivation, forest quality improvement, etc.)? Do you have any good suggestions?
7. In the context of carbon neutrality, what do you think are the challenges for implementing strategies of reducing carbon emissions (e.g., forest land protection management, forest fire and pest control, etc.)? Do you have any good suggestions?
8. In the context of carbon neutrality, what do you think are the challenges for implementing strategies of increasing the carbon stock in harvested wood products (e.g., extend the lifecycle of products etc.)? Do you have any good suggestions?
9. In the context of carbon neutrality, what do you think are the challenges for implementing strategies of developing forestry biomass energy? Do you have any good suggestions?
10. In the context of carbon neutrality, what do you think are the challenges for implementing forestry carbon sink project (e.g., carbon measurement, reporting and verification, project management and trading, etc.)? Do you have any good suggestions?
11. Is there anything else relevant you would like to add?
